

Supporting HIV cure researchers in Africa

The **CFAR Africure Program** aims to advance Cure research in Africa by providing five mentored developmental awards of \$150,000 for one year to early/mid-career investigators from sub-Saharan Africa whose research focuses on HIV Cure strategies. This program intends to attract highly talented early- and mid-career stage investigators from sub-Saharan Africa to address critical questions related to HIV cure research. Recipients of the awards will be mentored by and collaborate with established HIV investigators across CFARs and affiliated institutions in Africa, with the goal of having a transformational impact on the careers of African investigators, their institutions, and the entire HIV cure enterprise.

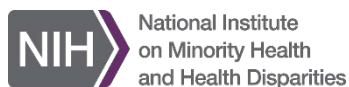

Important Dates:

- Concept Proposal due: **November 7, 2023**
- Notification of Outcome: **November 22, 2023**
- Invited Applications due: **January 22, 2024**
- Notification of Outcome: **February 19, 2024**
- Project Period: **March 1, 2024 – February 28, 2025**

This program is funded by the US National Institutes of Health & National Institute on Minority Health and Health Disparities, and administered through the Johns Hopkins University Center for AIDS Research (CFAR) & Inter-CFAR Sub-Saharan Africa Working Group.
